

INCREASE PROCESS EFFICIENCY

AVOID UNSCHEDULED DOWNTIME

PREVENT CAPEX INVESTMENTS

Engine & Generator Coolers

OUR SERVICE FOR PRESSURE GAS COOLERS

The pre-, inter-, and aftercoolers for gas compressors are an integral part of driving the plant efficiency.

Regular servicing and upgrades will lead to improved cooler capacity and boost the plant's performance.

Preventive maintenance and services will also help to avoid defects before they occur, such as leakages caused by corrosion, or compressor vibrations causing cracks in tubes and sidewalls.

REPLACEMENT OF COOLING BUNDLES

After years the compressor cooler can be affected by e.g. corrosive media which runs through the heat exchanger every day.

In this case, after mechanical and thermal analysis, a replacement of the cooling bundle can easily help to solve the problem so that no long downtime of the equipment is necessary.

MORE THAN 30 SERVICE LOCATIONS WORLDWIDE

Kelvion Service starts from our first contact with you and continues after your order has been delivered, with us as your reliable service partner. Thanks to our worldwide service centers, we are always close to you.

Get in contact

The original housing of the cooler itself (even it is a non-Kelvion product) can be retained so that there is no impact on the specified plot space in the plant.

IMPROVE YOUR PLANT EFFICIENCY

- ▶ Improve cooler efficiency by considering thermal calculations and material upgrades
- ▶ Replacement of Single Tubes by Compact Fin Bundles reduces CAPEX
- ▶ Compact Fin Solutions allow for a higher cooler capacity in the same footprint

UPGRADES & REPLACEMENTS

ALL BRAND SERVICE

Besides being experts in our own products and our former brands, we also have the expertise to service other brands.

SERVICE PORTFOLIO | PRESSURE GAS COOLERS

EARLY LIFE

- ▶ Installation & Commissioning
- ▶ Assistance to assembly and disassembly
- ▶ Supervision of installation by Kelvion experts

REPAIRS, OVERHAULS & MAINTENANCE

- ▶ Cleaning of the cooling bundle (inside and outside) and the boiler
- ▶ Brush cleaning of the tube side including documentation of results
- ▶ Renewal of corrosion protection and exterior painting
- ▶ Retubing
- ▶ Repairs / Emergency repairs
- ▶ Pressure testing on water side

UPGRADES & REPLACEMENTS

- ▶ Modifications and replacements of Kelvion and non-Kelvion products
- ▶ Design change from existing single tube design to state of the art fin tube systems modifications and replacements of Kelvion and non-Kelvion products

SPARE PARTS & SPARE PART SOLUTIONS

- ▶ Cooling bundles
- ▶ Gaskets and screws
- ▶ Water separators
- ▶ Cleaning brushes

MONITORING, CONSULTING & TRAINING

- ▶ Examination and assessment of operating conditions
- ▶ Endoscopic examination of tube side regarding pollution, corrosion and erosion
- ▶ Examination of fin side regarding pollution, corrosion and erosion
- ▶ Analysis of water and other product samples
- ▶ Investigation of corrosion problems (destructive testing and sample analysis)
- ▶ Assessment of deposits or corrosion products which may possibly occur on the tube side
- ▶ General visual inspection and documentation of results
